Summary

Driven by **out of the box innovation** and creative autonomy, I build intelligent systems using machine learning, **agentic AI**, **custom LLMs**, and **voice enabled applications** with a focus on human centered design. Alongside **AI**, I develop modern full stack web applications using React, Next.js, JavaScript, and Python, blending engineering, interactivity, and **visual experience**. I enjoy exploring the intersection of technology, visuals, and user experience while actively building projects that strengthen core fundamentals and push creative and technical boundaries.

Experience

Dodo Money Changer Pvt. Ltd.   Jan 2025 – May 2025
Web Developer Intern   Trichy, India
🔗 Website of Dodo Money Changer Trichy.

- Developed and deployed a responsive company website using Vite, React, JavaScript (ES6+), HTML5, and CSS3, managing code with Git and GitHub in a VS Code environment, which helped drive a 40% increase in online inquiries.

- Used Google Analytics and social media insights to analyze CTR and user interaction, then iterated on content, layout, and posting schedule, improving social media engagement by 25% across key platforms.

SRM ACM Student Chapter   Aug 2025 – Present
Head of Events   Trichy, India

- **Orchestrated** 10+ high impact technical events and hackathons for **500+ participants**, managing logistics and budget allocation to ensure operational freedom and creativity.

Education

SRM Institute of Science and Technology   Jun 2023 – Present
Bachelor of Technology in Computer Science and Engineering   Trichy, India
8.7 GPA

Campion Anglo-Indian Higher Secondary School   2023
XII - Higher Secondary

Projects

Agam Puram
Hugging Face Transformers, PyTorch, spaCy, Twilio API

Developed a custom Large Language Model trained on Tamil literature from Project Madurai. Integrated a multilingual voice bot (English, Tamil, Hindi, Malayalam.) with WhatsApp accessibility for seamless user interaction.

Skills

Full stack developer experienced in JavaScript ES6+, React, Next.js, React Native, Node.js, Python, and Java. Builds responsive and accessible UIs using semantic HTML and handcrafted CSS SCSS with a focus on performance. Skilled in REST APIs, SQL, Git GitHub, Redux Context, debugging, optimization, and agile development. Experienced with machine learning, NLP, agentic AI, LLM integration, data engineering, and cloud tools like AWS and TensorFlow.js.

Interests

Game Tester & Multiplayer Systems Analyst
Bug hunting and exploit analysis in Apex Legends and GTA V, Network stress testing for stability analysis, Multiplayer performance and vulnerability testing.

Awards

Heisen Hack 2025   Oct 2025
SRM ACM SIGKDD Chapter, SRM Institute of Science and Technology, Kattankulathur.

Achieved **Top 10 rank among 600+ participating teams** in a 36-hour intercollegiate hackathon by developing an innovative tech solution aligned with the event's problem tracks.
